AND CIVIL SOCIETY

Demographic Workbook: *A statistical presentation of communities of color in 21 counties in the New York metropolitan region*

SUMMARY DATA

Center on Philanthropy and Civil Society
as a member of the
Coalition for New Philanthropy in New York

Draft Document
Not for Duplication or Citation

2004

Introduction

The *Demographic WorkBook* examines selected variables in 21 counties in the New York metropolitan area for African Americans, Asian American and Latinos. The variables include population size, ancestry, educational attainment, home ownership, and income. Each variable is broken down at the county and then zip code levels. Comparisons are made between the 1990 and 2000 profiles. The overall objective is to provide a portrait of each of the three ethnic groups by county and to show zip code-level concentrations of population and indices of income and assets.

At the beginning of each section of tables is a map grouping several proximate counties. The maps are designed visually represent the data, with shaded zip codes indicating the number of households with incomes of \$75,000 or more. The darkened areas may have a heightened philanthropic potential for the particular racial/ethnic group under examination.

The work is the result of the effort of a number of individuals. They include Dr. Joseph Pereira, CUNY Data; Dr. Felinda Mottino, Donor Research Project at the Center for the Study of Philanthropy; Dr. Eugene Miller, Center for the Study of Philanthropy; Lesley Hirsch, Center for Urban Studies; and Amal Muhammad, Center for the Study of Philanthropy. Our partners in the Coalition for New Philanthropy in New York—Enrique Ball, Hispanic Federation; Barbara Bryan, New York Regional Association of Grantmakers; Jessica Chao, Coalition for New Philanthropy in New York; Cao K. O, Asian American Federation of New York; and Erica Hunt, The Twenty-First Century Foundation—all provided valuable insight and suggestions. Finally, we want to express our appreciation to The Ford Foundation and the funders of the Coalition for New Philanthropy for their support of this research.

Explanatory Notes

***ZCTA**

Data are reported for the Census Bureau's ZIP Code Tabulation Areas (ZCTA). ZCTA, a new statistical entity developed by the U.S. Census Bureau for tabulating summary statistics from Census 2000, overcome difficulties in defining the land area covered by each US Postal Service ZIP Code. In most instances, ZCTA codes equal the ZIP Code for an area. The term ZCTA was created to differentiate between this entity and true USPS ZIP Codes.

***Race and Hispanicity**

Data from replies to questions on race and Hispanicity are reported in several ways. The category 'All Blacks' includes persons who report on the race question that they are Black and persons who also report they are Hispanic on the Hispanicity question. The

category 'Black, Non-Hispanic' contains fewer cases because it includes only persons who indicate that they are Black on the race question but who report that they are *not* Hispanic.

Similarly, the category 'All Asians' includes all persons who report their race as being 'Asian', regardless of how they answer the Hispanicity question. The category 'Asian, Non-Hispanic' includes persons who report they are Asian on the race question and *not* Hispanic on the Hispanicity question.

***Income Adjusted for Inflation**

Adjusting for inflation, \$75,000 in 2000 dollars was approximately equal to \$55,000 in 1990. To make comparisons between 1989 and 1999, we compared households whose earnings were in the income categories of \$50,000 or higher in 1989 to households in income categories of \$75,000 or more in 1999.
